### SUMMARY

I am a dedicated B. Tech student specializing in Computer Engineering with a solid grasp of full-stack development and UI/UX design. My experience includes developing responsive applications utilizing modern frameworks. I have a strong foundation in programming languages like Python and Java, and I thrive in collaborative environments where I can contribute to innovative projects

### EXPERIENCE

#### Frontend Intern

Ayodhya

##### BHARAT INTERN

11/2023 - 12/2023

Internship focused on frontend development and UI/UX design

- Designed and developed a Netflix-inspired frontend page with modern UI/UX
- Created a responsive design and ensured smooth navigation
- Developed a dark-themed homepage with Navbar featuring Netflix logo and navigation menus
- Implemented Hero Banner showcasing featured movies with Play/Info buttons
- Created Movie Sections like Trending Now and Popular with horizontal scroll
- Added hover effects and responsiveness for an interactive user experience

### EDUCATION

#### B. Tech (Computer Science and Engineering)

Ayodhya

Institute of Engineering Technology Ayodhya

08/2019

#### Class XII

Uttar Pradesh

Uttar Pradesh

04/2018 - 04/2018

#### Class X

Uttar Pradesh

Uttar Pradesh

04/2016 - 04/2016

### HINDI

English   (Native)

### SKILLS

Gmail, JWT, Node.js, Express.js, MySQL, MongoDB, React, TypeScript, REST, Python, JavaScript, Core Java, Advanced Java

### PROJECTS

#### Wellness Session App

06/2025 - 08/2025

A full-stack application designed for wellness sessions

- Built a Wellness Session App with secure JWT authentication
- Implemented role-based access and protected routes using Node.js, Express.js, and MongoDB
- Developed a responsive React (TypeScript) dashboard with session management features

#### Know Your Ayodhya

2024 - Present

A location-based web app that provides real-time information on important places, routes, and cultural sites in Ayodhya.

- Building **Know Your Ayodhya**, a smart information platform to help users easily explore Ayodhya's landmarks using maps and quick search.

#### Backend-Focused SaaS

2025 - 11/2025

Created an API-centric SaaS application offering text-to-PDF services with JWT-secured endpoints and usage monitoring.

Implemented a lightweight React UI while prioritizing backend performance, error handling, and clean microservice-style structure.

- Focused mainly on backend architecture, ensuring high scalability, modular controllers, and secure data flow.
